## Profile

A hard-working, detail-oriented, and self-motivated Mobile Application Developer with hands-on experience in building and deploying cross-platform applications using Flutter for both **iOS** and **Android**. Passionate about clean architecture, responsive UI design, and performance optimization. Continuously learning and implementing new technologies to enhance development efficiency and deliver innovative, user-friendly mobile solutions.

## Experience

### Rain+ MMC

IT üzrə Mütəxəssis

**August 2021 - Present**

- Built responsive UI in Flutter using SOLID principles and MVVM/MVC architecture for clean and maintainable code.
- Designed and implemented project architecture with API integrations and modular structure.
- Experienced in Clean Architecture and scalable app design.
- Developed, debugged, and maintained Flutter apps, ensuring high performance and reliability.
- Managed all mobile development tasks: bug fixing, testing, optimization, and refactoring.
- Published apps on Google Play and App Store with successful releases.
- Researched and adopted new technologies and best practices to improve app quality.
- Collaborated with design and backend teams to deliver cohesive and functional user experiences.
- Created and integrated custom widgets and animations to enhance UI/UX.
- Improved app performance and code quality through optimization and refactoring.
- Participated in feature planning and prioritization with the team.
